Extraction error correlation - Alteck Soils

```
##
##  Pearson's product-moment correlation
##
## data:  c and sh
## t = 0.29581, df = 8, p-value = 0.7749
## alternative hypothesis: true correlation is not equal to 0
## 95 percent confidence interval:
##  -0.5624456  0.6885484
## sample estimates:
##       cor
## 0.1040159
```

Difference between error means - Water

Two tailed, if P < 0.05, we reject the null hypothesis that u1 = u2.

Results show that we cannot reject H_o (i.e., that means are equal, thus no sig. difference exists between means and the two populations distributions do not differ.

```
## [1] -0.05033333
```

```
## [1] 0.2173
```

```
##
##  Wilcoxon rank sum test
##
## data:  mQ and envW
## W = 5, p-value = 0.1714
## alternative hypothesis: true location shift is not equal to 0
```

Difference between error means - Soils

Paddy vs Rouff

```
## [1] -0.1447
```

```
## [1] 0.8648212
```

```
##
##  Wilcoxon signed rank test
##
## data:  paddy and rouff
## V = 1, p-value = 0.003906
## alternative hypothesis: true location shift is not equal to 0
```

Result: Paddy and Rouff are significantly different.

Paddy vs Alteck

```
## [1] 0.7649
```

```
##
##  Wilcoxon signed rank test
##
## data:  paddy and alteck
## V = 6, p-value = 0.02734
## alternative hypothesis: true location shift is not equal to 0
```

Result: Paddy and Alteck are significantly different.

Rouff vs Alteck

```
##
##  Wilcoxon signed rank test
##
## data:  rouff and alteck
## V = 47, p-value = 0.04883
## alternative hypothesis: true location shift is not equal to 0
```

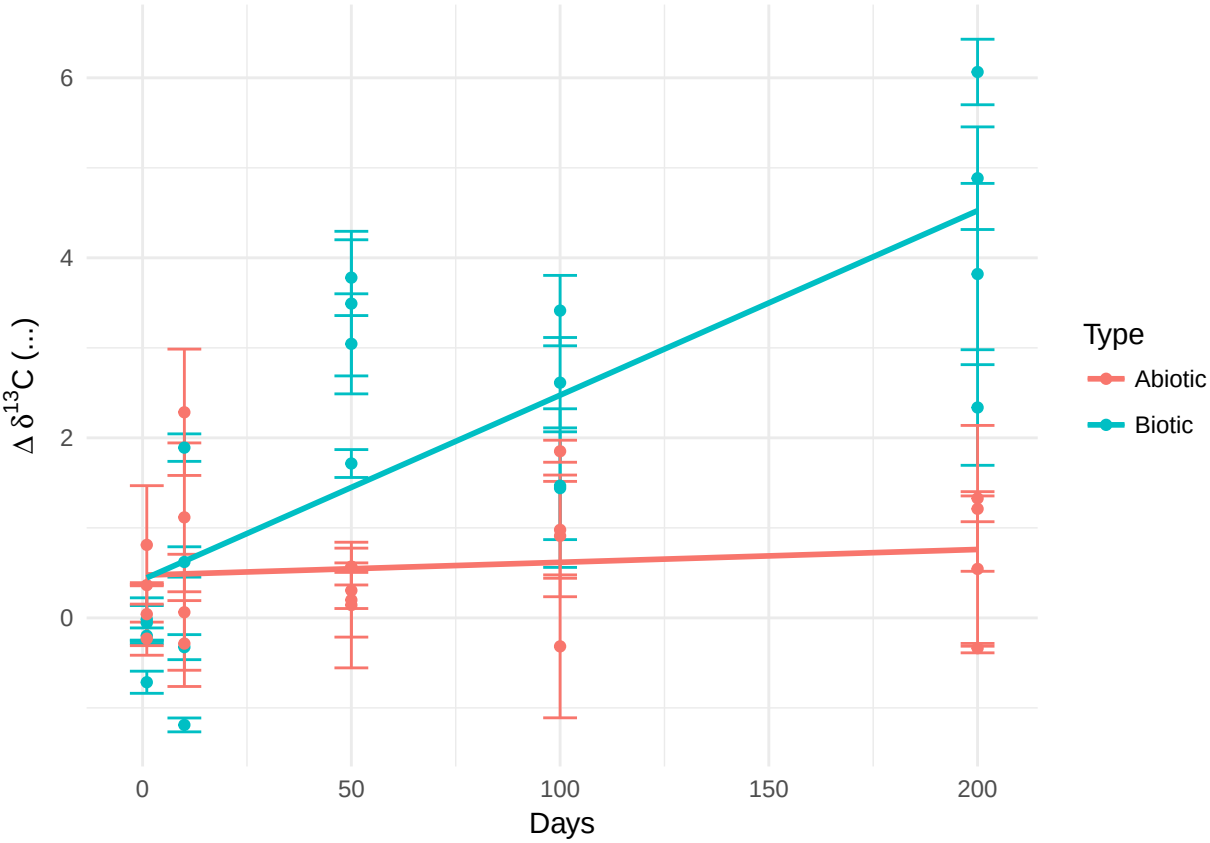
Result: Rouffach and Alteck are significantly different.

Propagated error

Propagated error accounts for 1 SD of initial product and 1 SD from the method

```
## [1] 1
```

All data



Degradation experiments and ε_{lab} derivation

```
##
##  Pearson's product-moment correlation
##
## data:  bio$Delta and bio$C.SM
## t = -9.7288, df = 8, p-value = 1.042e-05
## alternative hypothesis: true correlation is not equal to 0
## 95 percent confidence interval:
##  -0.9908231 -0.8361424
## sample estimates:
##        cor
## -0.9602422
```

Rayleigh (20 °C, θ: 20 & 40)
